

R 62 DVR

Made of grey cast iron, they are designed to work exclusively on railroads or beams, presenting machined shapes, which provide a firm and accurate movement. They are used in large size electric transformers, trolleys, agriculture industry dryers, etc. They are normally supplied with rigid casters for better fastening to the equipment. They can be eventually manufactured with special material, like steel or bronze special alloys.

Hardness: 150 HB.

Color: Black.

Temperature: from -40° up to 250° C.
